This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (original): A compound 8 to 50 nucleobases in length targeted to a nucleic acid molecule encoding inhibitor-kappa B-R, wherein said compound specifically hybridizes with said nucleic acid molecule encoding inhibitor-kappa B-R and inhibits the expression of inhibitor-kappa B-R.

Claim 2 (original): The compound of claim 1 which is an antisense oligonucleotide.

Claim 3 (canceled)

Claim 4 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified internucleoside linkage.

Claim 5 (original): The compound of claim 4 wherein the modified internucleoside linkage is a phosphorothioate linkage.

Claim 6 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified sugar moiety.

Claim 7 (original): The compound of claim 6 wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.

Attorney Docket No.: RTS-0302
Inventors: Monia and Watt
Serial No.: 09/993,731
Filing Date: November 13, 2001
Page 3

Claim 8 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified nucleobase.

Claim 9 (original): The compound of claim 8 wherein the modified nucleobase is a 5-methylcytosine.

Claim 10 (original): The compound of claim 2 wherein the antisense oligonucleotide is a chimeric oligonucleotide.

Claim 11 (original): A compound 8 to 50 nucleobases in length which specifically hybridizes with at least an 8-nucleobase portion of an active site on a nucleic acid molecule encoding inhibitor-kappa B-R.

Claim 12 (original): A composition comprising the compound of claim 1 and a pharmaceutically acceptable carrier or diluent.

Claim 13 (original): The composition of claim 12 further comprising a colloidal dispersion system.

Claim 14 (original): The composition of claim 12 wherein the compound is an antisense oligonucleotide.

Claim 15 (original): A method of inhibiting the expression of inhibitor-kappa B-R in cells or tissues comprising contacting said cells or tissues with the compound of claim 1 so that expression of inhibitor-kappa B-R is inhibited.

Attorney Docket No.: **RTS-0302**
Inventors: **Monia and Watt**
Serial No.: **09/993,731**
Filing Date: **November 13, 2001**

Claim 16 (original): A method of treating an animal having a disease or condition associated with inhibitor-kappa B-R comprising administering to said animal a therapeutically or prophylactically effective amount of the compound of claim 1 so that expression of inhibitor-kappa B-R is inhibited.

Claim 17 (original): The method of claim 16 wherein the disease or condition is characterized by a heightened immune response.

Claim 18 (original): The method of claim 17 wherein the immune response involves increased cytokine expression.

Claim 19 (original): The method of claim 16 wherein the disease or condition is a result of infection.

Claim 20 (original): The method of claim 19 wherein the infection is viral, bacterial or parasitic.
